Risk Assessment Questionnaire for Tuberculosis Exposure

Please circle yes or no to each question below.

1. Was your child born outside the U.S.? Yes No

If born in any of the countries in the attached list, a TST or IGRA (tests for tuberculosis) should be performed (Note: !GRAs are not recommended for children <5 years old).

2. Has your child traveled outside the U.S.? Yes No

If the child traveled to any of the listed countries, stayed for >1 week and interacted with the local population, including local family or friends, then a TST or IGRA should be performed. For most children, testing, after evaluation for possible signs and symptoms of TB disease or exposure to a person with contagious pulmonary TB, can take place 8-10 weeks after return to the United States.

3. Has your child been exposed to anyone with TB disease? Yes No

If yes, determine whether the person had TB disease or latent TB infection, when the exposure occurred and what the nature of the contact was. **If** it is confirmed that the person had known or suspected TB disease, a TST or IGRA should be performed.

4. Does your child have close contact with someone with a positive TST or IGRA? Yes No

If yes, see previous question for follow-up information needed.

5. Does your child live with anyone who has been in jail or prison, a shelter, who injects illegal drugs or has HIV? Yes No

If yes, then a TST or IGRA should be performed.

6. Has your child eaten unpasteurized cheese from Mexico or Central America since their last TST or IGRA? Yes No

If yes, a TST or IGRA should be performed.
